## **DETAILED ACTION**

### ***Response to Amendment***

Replacement drawings were received on 03/24/2009. These drawings are not acceptable they do not sufficiently describe the claimed invention. The drawing of fig. 1 shows newly added gradient coil as well as RF coil. Furthermore, the drawings do not sufficiently show coils "carried" by the compound as claimed. The new drawing appears to show the coils in the compound rather than "carried" by the compound.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not sufficiently provide enablement as to the way by which the coils are "carried" by the compound as claimed.
